### How to repair FEM/BDC Version is not supported ,please

### upgrade FEM/BDC first

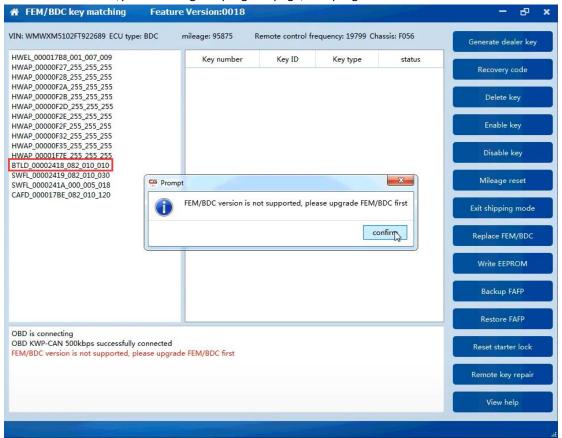

When it shows this error ,follow the steps to do

Check the BTLD version

G series car can not support

If it is 82 or 83 , you have to go to program page .the advanced mode , and program it with 80 version

If it is other version, you have to go to program page, and program it with default version

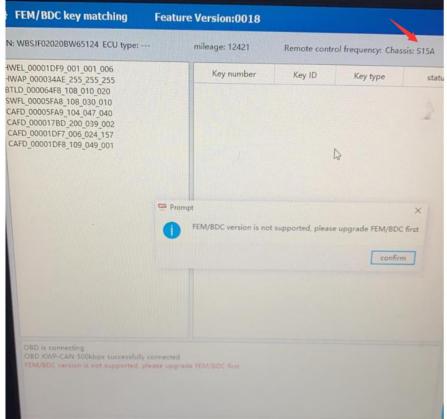

# 1 Can not support G series

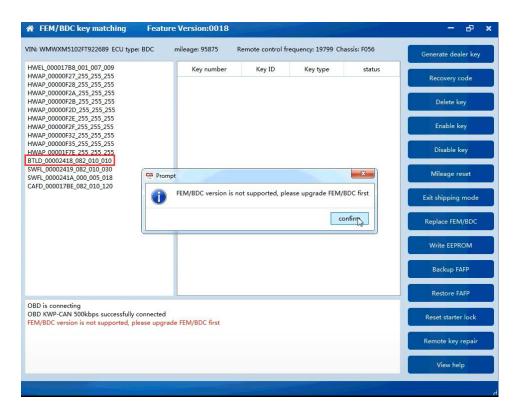

If your FEM shows as the picture below shows (FEM2 or BDC2 ), Then no need to do operation , send it to dealer to do.

If it not shows you F chassis in CGDI BMW software, Then means it not supports with CGDI

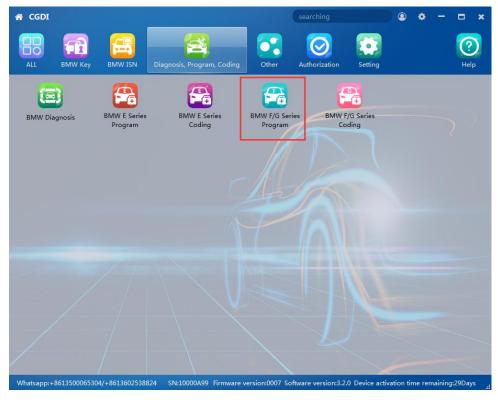

### 2 If it is 82 or 83 version

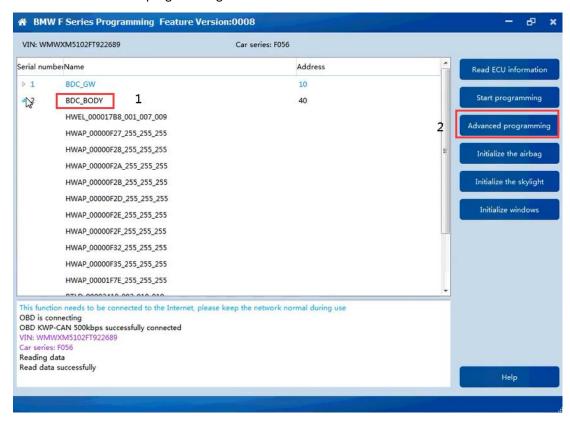

# 2.1 program your FEM with advanced mode

Go to "BMW F/G series program"

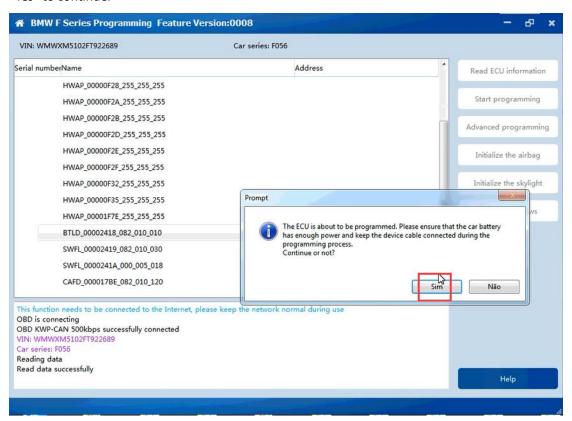

#### Choose BDC-body

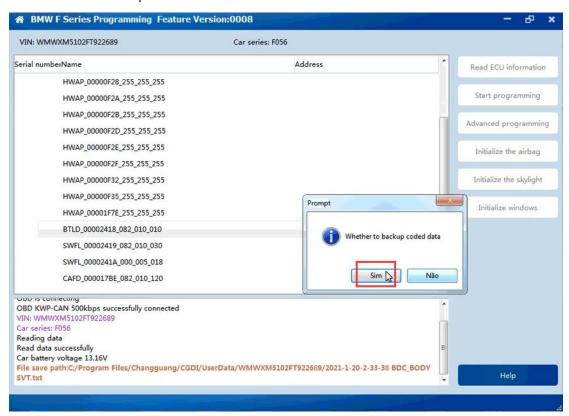

Then choose advanced programming

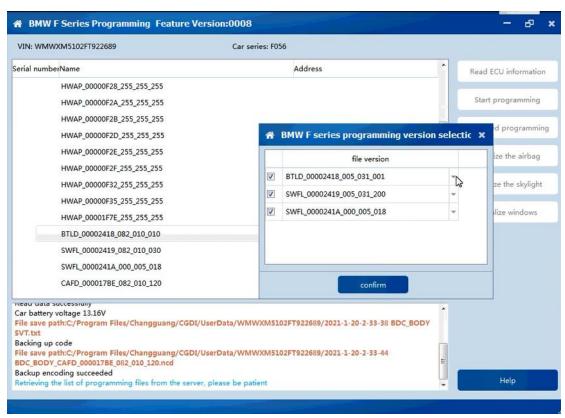

Follow the prompt "The ECU is about to be programmed. Please ensure that the car battery has enough power and keep the device cable connected during the programming process. Click on "Yes" to continue.

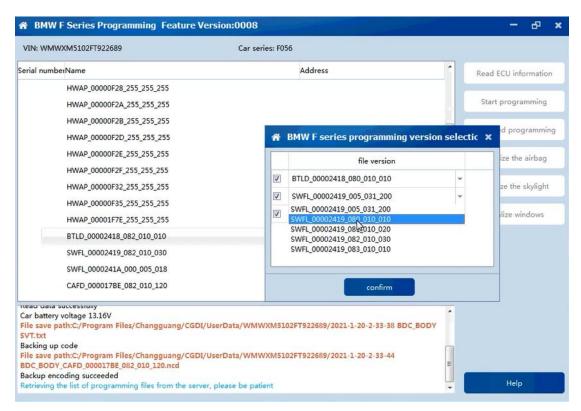

Click on "Yes" to backup the coded data.

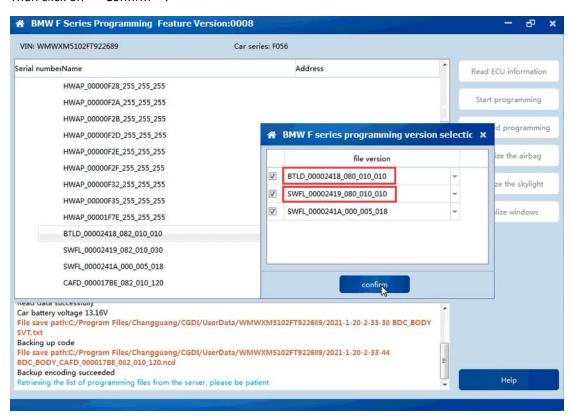

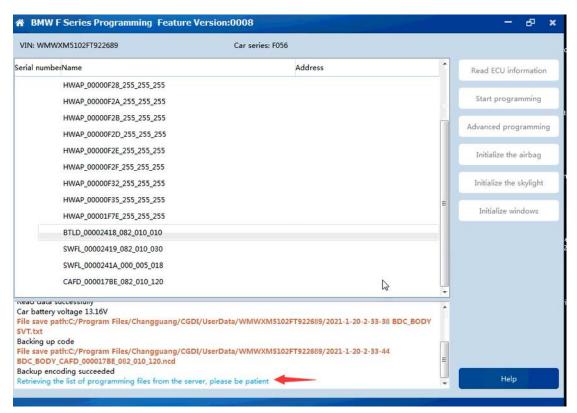

Next is BMW F series programming version selection, please choose "BTLD-80", the next one is to choose "SWFL-80".

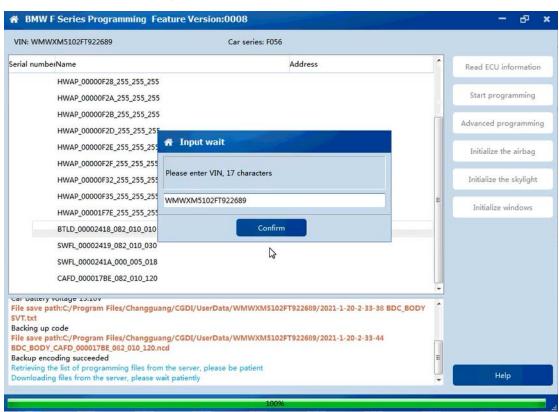

Then click on "Confirm".

It will get file from the server , the responding time depend on your internet ,some times it may have to wait longer .Be patient please

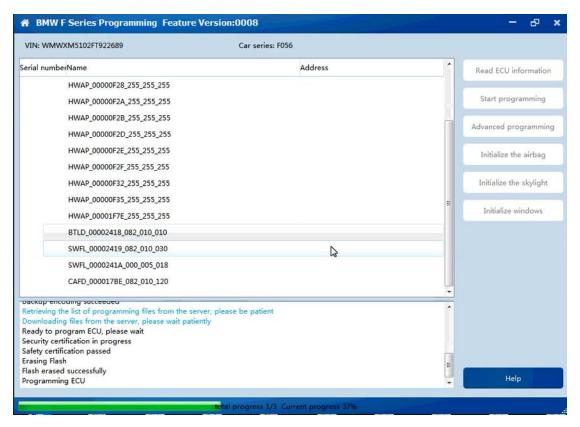

When it shows 100%, It will tip you VIN 17 characters. Check it then click confirm

Then it will program ECU…It will take about 8 minutes.

When it shows 100%, it means ECU programmed and succeed.

Then it will have two tips

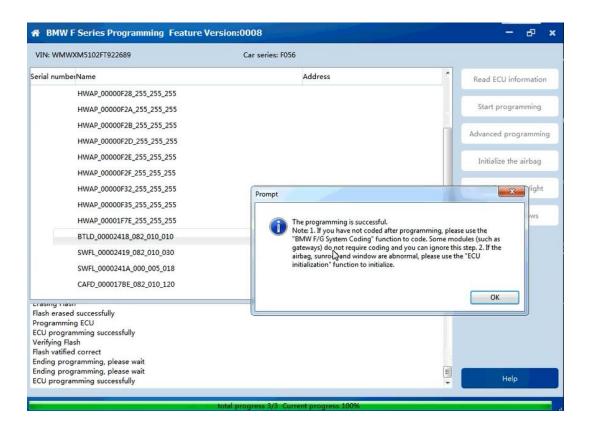

Note 1: When you need to code FEM . Here better to code your FEM

### (Or you can add your key first ,then go to code )

Note2: if your airbag, sunroof and window are abnormal, please use the "ECU initialization" function to initialize.

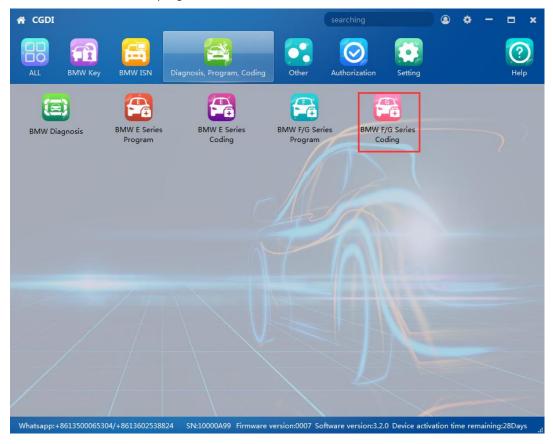

Tip: If you Check it in FEM/BDC Key match page, it is expected to work now. But better you

code your FEM first, Then go to FEM/BDC Key match page, do other steps

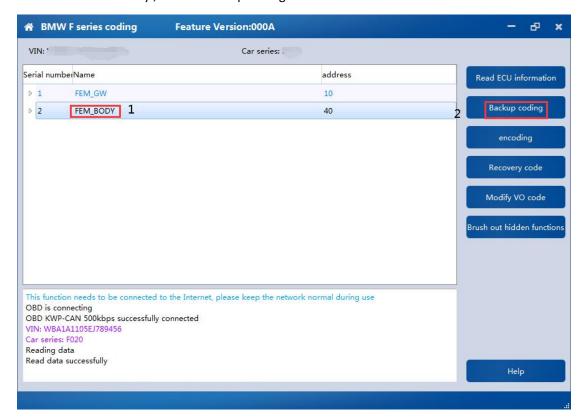

### 2.2 Code your FEM

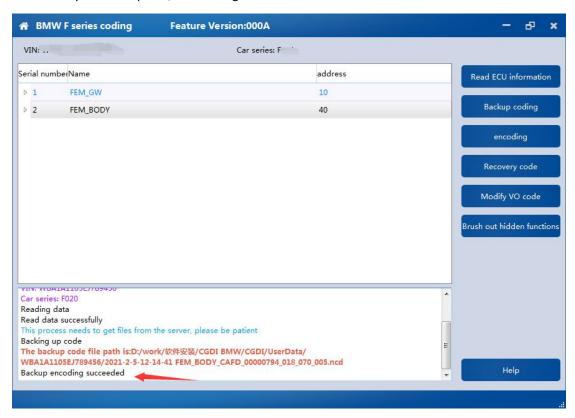

Go to "BMW F/G series program"

Then Choose BDC-body, choose backup coding

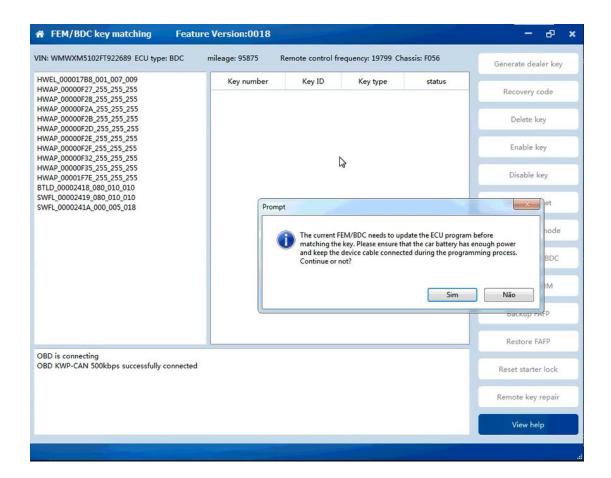

It will save your backup file ,then coding succeed

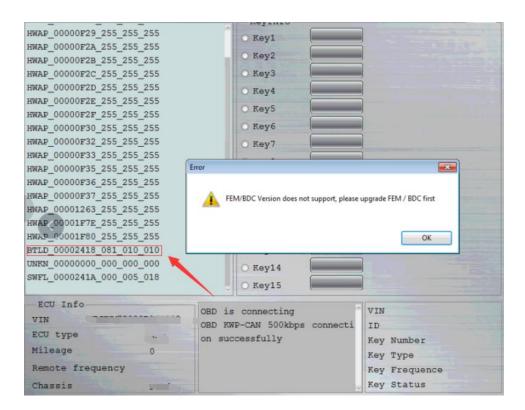

# 2.3 Check FEM/BDC Key match page

It can work now ,it will update ECU program ,Make sure your battery has enough power

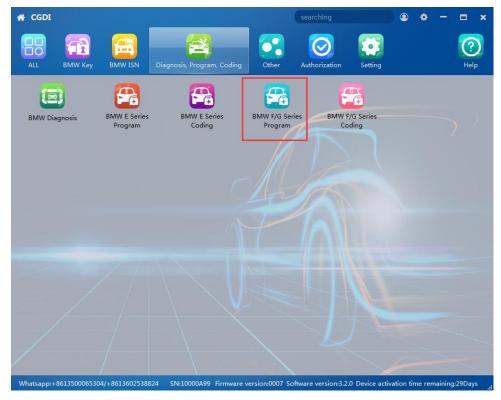

### 3 If it is not 82 or 83 version

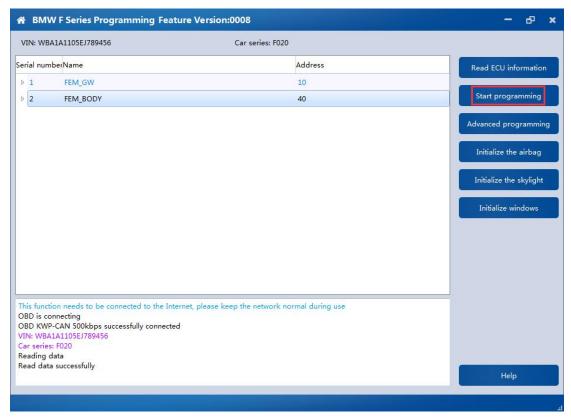

### 3.1 program your FEM

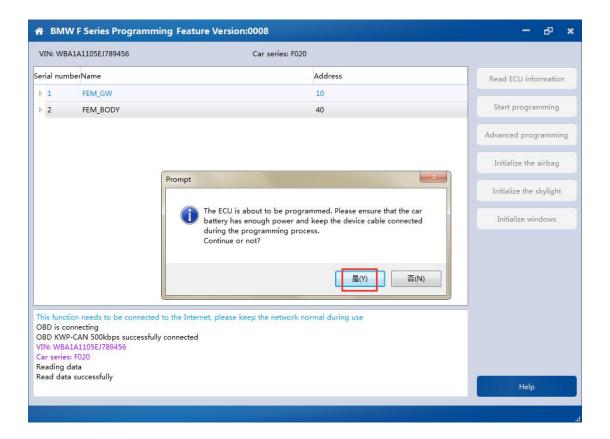

Go to "BMW F/G series program"

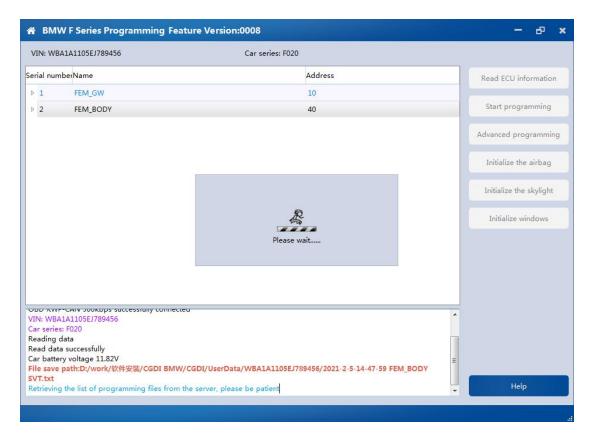

#### Choose BDC-body

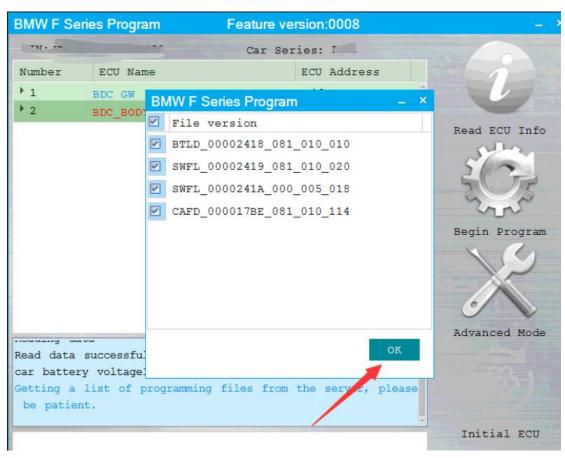

Then choose start programming

Here no choice can choose, click ok to program it directly.

The next steps is same as 2.2 and 2.3 (No repeat pic here )

It will get file from the server , the time depends on your internet ,some times it may need wait longer .Be patient please

When it shows 100%, It will tip you VIN 17 characters. Check it then click to confirm

Then it will program ECU…It will take about 8 minutes.

When it shows 100%, it means ECU programmed and succeed.

Then it will have two tips

Note 1: When you need to code FEM . Here better to code your FEM

# (Or you can add your key first ,then go to code )

Note2: if your airbag, sunroof and window are abnormal, please use the "ECU initialization" function to initialize.

If you Check it in FEM/BDC Key match page, it shoud can work now. But better you

code your FEM first, Then go to FEM/BDC Key match page, take other steps

# 3.2 Code your FEM

Go to "BMW F/G series program

Then Choose BDC-body, choose backup coding

It will save your backup file, then coding succeed

### 3.3 Check FEM/BDC Key match page

It can work now, it will update ECU program, Make sure your battery has enough power
